Brand architecture

JBS Praxis. Consulting and engineering for Africa's institutions.

Version 1.1, 29 October 2026. In English and French.

How to use this book

This is the reference for every word, screen, email, document and campaign JBS Praxis produces. When existing code, copy or design disagrees with this document, this document wins and the other thing gets changed. It replaces the "command centre" language and neon styling the products carry today.

Who uses it: anyone designing, writing or building for JBS Praxis, including AI agents. Agents working on the website (PR2 to PR4), HQ, the Client Portal or emails read sections 4 to 15 before starting, and copy terms from section 5 exactly.

What is fixed by the owner: the logo, the logo's colours, the two typefaces (Newsreader and Plus Jakarta Sans) and the decisions logged in Appendix A. Everything else here can be refined through the review process in section 16.

How to read it: straight double quotes in this document only mark where an example starts and ends; the text inside them is exact. French examples are typed with the French spacing characters described in section 4, so copy them as they are.

Where to start

If you work in	Read first
Sales and partnerships	1 Brand platform (positioning, promise, proof, boilerplates), 2 Brand architecture, 4 Voice, 5 Vocabulary
Marketing and content	1 Brand platform, 3 Personality, 4 Voice, 5 Vocabulary, 10 Imagery, 14 Applications, and the brand kit
Design and engineering	6 Logo to 15 Design tokens
Anyone writing in French	4 Voice (French, numbers and dates) and 5 Vocabulary

1 Brand platform

The idea in the name

Praxis is theory put into practice: an idea made real by doing it. That is the whole business. Every institution has a picture of how it is meant to run: the policies, the organisation chart, the budget, the process map. And every institution has the way it really runs: numbers rebuilt by hand each month, approvals that live in one person's memory, policies that live in a PDF. JBS Praxis closes the gap between the two.

Purpose

Close the gap between how Africa's institutions are meant to run and how they really run.

«Réduire l'écart entre la façon dont les institutions africaines doivent fonctionner et la façon dont elles fonctionnent réellement.»

Essence

Order, made visible.

Most institutions run on effort: heroic month-ends, spreadsheets passed from hand to hand, decisions held in a few people's heads. JBS Praxis does two things. First we make the order: we design how money, people, operations and risk should flow. Then we make it visible: we build the system that shows, every day, whether they do. Consulting makes the order; engineering makes it visible.

Two supporting ideas sit beneath the essence. They are not separate slogans; they are what order makes possible.

Supporting idea	What it means	Where it shows up
Institutions in motion	Once leaders can see clearly, the institution moves: faster decisions, cleaner operations, growth that holds.	Case studies, the "before and after" of an engagement, the About page
Ask your company anything	How a well-run institution feels to lead: a question gets a straight answer, from the institution's own data, in seconds.	The homepage line, the AI assistant, HQ overviews, product demos

The homepage keeps the line chosen earlier, **"Ask your company anything."**, always followed by the support line that says how (section 14). "Order, made visible" is the internal compass and the brand's closing line. It is used sparingly in public (brand films, the About page, the last page of a proposal), never as a repeated slogan.

Descriptor

Consulting and engineering for Africa's institutions. «Conseil et ingénierie pour les institutions africaines.»

The descriptor tells a newcomer what JBS Praxis is. It sits with the logo in the website header area, on the LinkedIn profile, in email footers, on proposal covers and in every boilerplate.

Platform lines in both languages

These are fixed. Agents and writers use them exactly; they are not re-translated.

Line	English	Français
Essence	Order, made visible.	L'ordre, rendu visible.
Homepage line	Ask your company anything.	Posez toutes vos questions à votre entreprise.
Homepage support	We design how your organisation runs, then build the system that answers for it.	Nous concevons le fonctionnement de votre organisation, puis le système qui en rend compte.
Supporting idea	Institutions in motion	Des institutions en mouvement
Descriptor	Consulting and engineering for Africa's institutions	Conseil et ingénierie pour les institutions africaines
Promise	A straight answer to every question about your money, people, operations and risk, from a system your own team can run.	Une réponse claire à chaque question sur vos finances, vos équipes, vos opérations et vos risques, tirée d'un système que vos équipes pilotent elles-mêmes.

A native French-speaking reviewer in Douala signs off these lines before launch (section 16).

Positioning

For chief executives and finance and operations leaders of institutions in Nigeria and Cameroon that have outgrown spreadsheets, inboxes and memory,

JBS Praxis is the consulting and engineering firm that designs how the institution should run and builds the system that makes it run that way, in English and French, under IFRS and OHADA.

Unlike strategy firms that leave a deck behind, or software vendors that leave a licence behind, JBS Praxis stays until the system holds, then hands your team the keys.

"Across Africa" belongs to the purpose and the About page. The positioning stays where the firm can prove it today: Nigeria and Cameroon, English and French, IFRS and OHADA.

Promise

A straight answer to every question about your money, people, operations and risk, from a system your own team can run.

The promise is testable: a client can ask a question and see whether the answer comes back, and can check whether their own people run the system without us.

The Praxis Method

One method, four stages, used to explain every engagement. It replaces "The Predictive Praxis Framework™".

Stage	What happens	FR
See	Map how one area of the institution really runs today. Starts with the free operations audit.	Diagnostiquer
Design	Design how it should run: processes, controls, roles, the numbers that matter.	Concevoir
Build	Build and configure the system that runs it and shows it.	Construire
Hold	Stay until it holds, train the team, then hand over the keys.	Pérenniser

This is a real sequence, so it is one of the few places numbered steps are correct.

Proof

Proof is organised by business domain, the way a leader thinks about the institution, not by technology. A capability without a number is not proof.

Domain	Client evidence (situation → system → result)	Naming status	How we use it ourselves
Money	Smart Logistics and Services: OHADA-compliant finance; Pixie Girl Global: IFRS reporting. Results to be quantified.	Named, approved	We run our own invoicing, payments and ledger on HQ
Human Capital	To be added from client work	—	We run our own payroll, time and approvals on HQ
Operations	Horizon Segment (oil and gas): real-time rig tracking, automated daily drilling reports, dual-signature tickets, procurement pipeline. MyCity App. Results to be quantified.	MyCity App named, approved; Horizon Segment naming not decided (owner)	We run our own projects and sprints on HQ
Risk and Governance	A leading pharmaceutical manufacturer, delivered with Tales Consulting	Described only, never named	Every HQ action is permissioned and logged
Data and AI	nfelia, a JBS Praxis product	Our product	"Ask your company anything" runs on our own data

Rules:

- Name a client only where the owner has approved it, and record the approval in the claims register.
- No figure in this document is a real claim unless it is in the claims register. Examples in sections 3–4 (18%, 11 days) are illustrative.
- Service times in copy ("within one business day", "within the hour") are used only once the owner confirms them as service levels.

Claims register

Every claim the brand makes in public is listed here before it is used. Agents never invent a claim, a client result or a certification.

Claim	Allowed wording	Evidence	Approved by	Review date
ISO 27001	"Aligned with ISO 27001" («aligné sur la norme ISO 27001»); never "certified" or "secured"	No certificate is held	Owner, 29 Oct 2026	Monthly
Client names	Only the names marked "Named, approved" above	Owner approval, 29 Oct 2026	Owner	Per engagement
Experience	Credentials by role (below), no combined years	—	Owner to confirm the list	Before launch

The live HQ sign-in page still says "ISO 27001 SECURED". It is removed in the HQ restyle.

Credentials without names

Clients buy consulting from people. While the leadership stays anonymous, authority is shown by role, method and writing:

- **Credentials by role, never by name.** Approved form (owner to confirm the list): "Our consultants and engineers come from banking, telecommunications, government audit, multinational consulting, oil and gas, logistics and software engineering."
- Never state combined years of experience.
- Every article carries the byline "JBS Praxis" and its practice: "From our Money practice".
- Proposals list the delivery roles (delivery lead, finance systems lead, engineering lead) with their sector backgrounds. Names are shared only under a confidentiality agreement and with the owner's approval.

Values (how we decide)

Value	We do	We don't
Show the working	Show the source, the assumption and the number behind every answer	Ask to be trusted on our word
Make it hold, then hand over the keys	Stay until the system runs and your team can run it without us	Leave behind a deck, a licence or a dependency
Keep confidences	Describe, never name; client data stays the client's	Name-drop, reuse client data, trade on access
Calm under pressure	Stay measured when things go wrong; give the next step	Dramatise, alarm, blame

Audiences

Audience	Must believe	Proof they need
Chief executive, managing director	JBS Praxis will make the institution governable and visible to the board	The method, a named case, the "ask your company anything" demo
Finance director	Close faster, comply with IFRS and OHADA, see cash daily	Ledger and reporting proof, the Money practice
Operations director	Work in the field is visible and controlled	The Horizon Segment case, live dashboards
Board and audit committee	Controls are real and evidenced	Permissions, audit logs, the claims register's honesty
Public-sector leaders	Accountability and transparency for citizens	MyCity App, approval trails
Staff and recruits	Serious work, done well, that builds a career	The method, the writing, the Careers page

Competitive frame

Alternative	What it leaves behind	Where JBS Praxis stands
Big Four local practices	A report built on a global template	Designed for the terrain, then built and held
Global strategy firms	A deck	The system that runs the decision
ERP integrators	A licence and a dependency	The way of working first, the system second, the keys handed over
Local software houses	Code without the operating model	Consulting and engineering in one team
The in-house spreadsheet team	Heroics every month-end	One source of truth the same team can run

Message house

Level	Message
Roof (the promise)	A straight answer to every question about your money, people, operations and risk, from a system your own team can run.
Pillar 1: we design the order	Processes, controls, roles and the numbers that matter, designed for IFRS and OHADA, for naira and CFA francs, for the way your institution really works.
Pillar 2: we build the system	The system that runs it and shows it, in English and French, built for weak connections and month-ends in two currencies. We run our own firm on it.
Pillar 3: we hand over the keys	We stay until it holds, train your team, and leave no dependency behind.
Foundation (proof)	The Praxis Method, named client work, our own firm running on JBS Praxis HQ, and the claims register.

Narrative

Every institution has two versions of itself. One is on paper: the policies, the organisation chart, the budget, the process map. The other is how the work really gets done: numbers rebuilt by hand at month-end, approvals that wait for one person, decisions made without the facts. The distance between the two is where money leaks, people tire and boards lose confidence.

JBS Praxis exists to close that distance. Praxis means theory put into practice. We start by seeing how the institution really runs. We design how it should run. We build the system that runs it that way and shows, every day, that it does. Then we stay until it holds, and hand the keys to the institution's own team.

The result is an institution that can answer for itself. Ask it anything, and it answers.

« Chaque institution existe en deux versions. L'une est sur le papier : les procédures, l'organigramme, le budget, la cartographie des processus. L'autre est la façon dont le travail se fait vraiment : des chiffres reconstitués à la main chaque fin de mois, des validations qui attendent une seule personne, des décisions prises sans les faits. C'est dans cet écart que l'argent se perd, que les équipes s'épuisent et que les conseils d'administration perdent confiance.

JBS Praxis existe pour réduire cet écart. Praxis signifie la théorie mise en pratique. Nous commençons par observer comment l'institution fonctionne réellement. Nous concevons la façon dont elle devrait fonctionner. Nous construisons le système qui la fait fonctionner ainsi et qui le montre, chaque jour. Puis nous restons jusqu'à ce que tout tienne, et nous remettons les clés aux équipes de l'institution.

Le résultat : une institution capable de rendre compte d'elle-même. Posez-lui toutes vos questions : elle répond. »

Boilerplates

Use these exactly, in press releases, proposals, partner pages, event listings and profiles.

About 25 words

JBS Praxis is a consulting and engineering firm for Africa's institutions. We design how organisations should run, then build the systems that make them run that way.

« JBS Praxis est un cabinet de conseil et d'ingénierie au service des institutions africaines. Nous concevons le fonctionnement des organisations, puis les systèmes qui le rendent réel. »

About 50 words

JBS Praxis is a consulting and engineering firm for Africa's institutions, working in English and French from Lagos and Douala. We design how money, people, operations and risk should flow, then build the system that shows, every day, whether they do. We stay until it holds, then hand your team the keys.

« JBS Praxis est un cabinet de conseil et d'ingénierie au service des institutions africaines, qui travaille en anglais et en français depuis Lagos et Douala. Nous concevons la façon dont vos finances, vos équipes, vos opérations et vos risques doivent fonctionner, puis construisons le système qui montre, chaque jour, s'ils fonctionnent ainsi. Nous restons jusqu'à ce que le système tienne, puis nous en remettons les clés à vos équipes. »

About 100 words

JBS Praxis is a consulting and engineering firm for Africa's institutions, working in English and French from Lagos and Douala. Most institutions run on effort: numbers rebuilt by hand, approvals held in a few people's memory. We design how money, people, operations and risk should flow, then build the system that shows, every day, whether they do. Our work spans finance systems under IFRS and OHADA, payroll and approvals, field operations and governance, for clients in pharmaceuticals, consumer goods, oil and gas, logistics and the public sector. We run our own firm on the system we build. Every engagement starts with a free operations audit.

« JBS Praxis est un cabinet de conseil et d'ingénierie au service des institutions africaines, qui travaille en anglais et en français depuis Lagos et Douala. La plupart des institutions fonctionnent à l'effort : des chiffres reconstitués à la main, des validations qui dépendent de quelques personnes. Nous concevons la façon dont vos finances, vos équipes, vos opérations et vos risques doivent fonctionner, puis construisons le système qui montre, chaque jour, s'ils fonctionnent ainsi. Nos missions couvrent les systèmes financiers aux normes IFRS et OHADA, la paie et les circuits de validation, les opérations de terrain et la gouvernance, dans la pharmacie, les biens de consommation, le pétrole et le gaz, la logistique et le secteur public. Nous gérons notre propre cabinet avec le système que nous construisons. Chaque mission commence par un audit opérationnel offert. »

2 Brand architecture

JBS Praxis is a **masterbrand**: one name carries the reputation. Everything clients buy or use sits under it with a plain descriptive name. Only a product sold on its own gets its own name, and it is endorsed by the masterbrand.

```
JBS Praxis                                  masterbrand · jbspraxis.com

```

Naming rules:

- Always write **JBS Praxis** in full. Never "JBS" alone, never "Praxis" alone in client-facing words, never "JBSPraxis".
- "JBS" is not expanded in public. JBS Praxis is the name (owner to confirm; see Appendix C).
- The legal entity name appears only in legal footers, contracts and invoices. The brand name never changes when the legal entity is registered or renamed.
- **JBS Praxis HQ** on first mention, then **HQ**. **JBS Praxis Client Portal** on first mention, then **Client Portal**; in running text for clients, "your portal". In French: «le portail client JBS Praxis», then «votre portail client».
- **A new offer gets its own name only if it is sold on its own to buyers who never buy consulting** (nfelia is the test case). Everything else takes a descriptive name under JBS Praxis.
- **JBS Praxis HQ is the system our own firm runs on.** It is shown as proof that we run on what we build (owner to confirm whether it will ever be sold).
- Modules inside HQ and the Client Portal use everyday nouns (section 5): Projects, Leads, Proposals, Invoices, Payments, Team, Time, Approvals, Reports, Settings.
- Practice pages carry a descriptive subtitle, for example "Money: finance systems, IFRS and OHADA reporting, cash and receivables".
- Client work built by JBS Praxis (for example MyCity App) is shown as proof, never as a JBS Praxis product.

- nfelia keeps its own identity. Next to JBS Praxis, use the endorsement line "a JBS Praxis product" in Plus Jakarta Sans at body-text size, never larger than the nfelia logo.
- **Partners and co-branding.** Work delivered with a partner firm names the partner only with both firms' approval ("delivered with Tales Consulting"). Co-branded proposals show both logos at equal height on the cover, separated by a 1px Line rule; JBS Praxis leads inside the document.
- **"intelligence@" is an address, never a displayed name.** The word "Intelligence" is no longer used as a brand or team name.

3 Personality

The quiet expert, with an engineer's rigour, who knows the terrain.

Think of the most trusted senior partner you have worked with: unhurried, precise, generous with what they know, never needing to impress. Underneath, an engineer's habit of showing the working: the number, the system, the reason. And they know the terrain: IFRS and OHADA, naira and CFA francs, regulator inspections, unreliable power and patchy connectivity. They design for it.

Trait	Sounds like	Never sounds like
Composed	"Here is what we found, and what we recommend."	"Huge news!!"
Precise	"Receivables fell 18% in Q3, mainly in two regions." (illustrative)	"Things improved significantly."
Generous	Explains the why, shares the method, gives the next step.	Withholds, gatekeeps, talks down.
Rigorous (the engineer's touch)	Shows the data source, the assumption, the trade-off.	Hand-waves, oversimplifies until it is wrong.
Grounded	"We designed the approval flow to work on a weak connection and through a month-end in two currencies."	"Global best practice says…", imported templates
Discreet	Respects confidentiality; describes rather than names.	Name-drops, boasts about clients.

What the brand is not: a hacker, a military command, a sci-fi console, a startup hype machine, a faceless bureaucracy.

4 Voice

The four principles

1. **Plain.** Everyday business words. If a CFO would not say it in a meeting, we do not write it.
2. **Precise.** Numbers over adjectives, specific nouns over vague ones, one meaning per word.
3. **Warm.** Write to one person. Use "you" and "we". Give the next step. Never cold, never chummy.
4. **Measured.** The Big Four discipline: lead with the conclusion, support it with structure and evidence, recommend clearly. Formal enough for a board pack, never stiff.

How to write

- **Answer first.** Put the conclusion or the action in the first sentence. Supporting detail follows.
- **Short sentences.** Aim for 15 to 20 words. One idea per sentence.
- **Active voice.** "We verified your payment", not "Your payment has been verified by our team".
- **Sentence case** for everything: headings, buttons, labels, email subjects. No all caps, no title case.
- **No exclamation marks** in client-facing writing. One is acceptable in an internal celebration message.
- **Numbers as numerals**, with units: "3 projects", "₦4.2m", "12 days". Spell out only at the start of a sentence.
- **British English** (organisation, programme, licence, centre, working day).
- **Contractions** (we'll, don't, couldn't) are fine in interface text and transactional email. Write them out in proposals, reports, contracts and the About page.
- **Typographic marks** in published copy: single quotes first in English (‘ ’, with “ ” inside them), «» in French, and ’ for apostrophes in both languages.
- **No hype or pseudo-technical intensifiers**: revolutionary, cutting-edge, world-class, best-in-class, synergy, leverage (as a verb), disrupt, seamless, robust, next-generation, game-changing, unlock, empower, supercharge, elite, premier, Tier-1, deterministic, forensic, immutable, hardcoded, cognitive, zero-defect, unbreakable, "Code as Law". Say what is true instead: "every change is logged" (not immutable), "built into the system" (not hardcoded), "rule-based" (not deterministic), "a detailed review" (not forensic). FR : «chaque modification est tracée», «intégré au système», «fondé sur des règles», «une revue détaillée».
- **No guaranteed outcomes** (return on investment, savings, uptime) unless a signed contract commits to them. Write "we estimate", "in our assessment", "typically".
- **No metaphors from war, space, hacking or injury**: command, battlespace, strike, deploy (for people), node, matrix, terminal, protocol, transmission, clearance, kill switch, god mode, bleeding, haemorrhage, disease, graveyard.

Numbers, money, dates

- **Currency in English**: ₦ before the amount, no space (₦1,250,000; ₦4.2m; ₦1.1bn). FCFA after the amount, with a space (2,500,000 FCFA; 2.5m FCFA).
- **Currency in French**: every currency after the amount (1 250 000 ₦ ; 2 500 000 FCFA). In tables «4,2 M₦», in sentences «4,2 millions de nairas». «Md» for milliard.

- **Dates and times**: Thursday 5 November 2026, 10:30 (WAT). FR : jeudi 5 novembre 2026, 10 h 30 (heure d'Afrique de l'Ouest, WAT). Lagos and Douala share WAT, so state the time zone once.
- **Periods**: Q3 2026 / T3 2026; FY2026 / exercice 2026.
- **Negative amounts**: a true minus sign (−, U+2212) in interfaces; brackets in financial statements.
- **Phone placeholders**: +234 800 000 0000 (Nigeria), +237 6 99 00 00 00 (Cameroon).
- **In code**, format numbers, money and dates with the intl formatters (`NumberFormatter` , `IntlDateFormatter`) for `en_GB` and `fr_FR` , never by hand. Check that the web PHP has the intl extension (the server's command-line PHP does not).

The formal touch (Big Four / McKinsey)

Used in proposals, reports, board-facing pages and the About page:

- State the situation, the complication and the recommendation, in that order.
- Headings in proposals, reports and slides are action titles: a full sentence that states the takeaway ("Receivables fell 18% in Q3, mainly in two regions", illustrative), not a topic ("Receivables").
- Every proposal opens with a one-page executive summary: the situation, what we recommend, what it changes, what it takes.
- Group points in threes where the content allows; never force it.
- Use "we recommend", "the evidence suggests", "in our assessment". Avoid "we think", "maybe", "kind of".
- Quantify the stakes: the cost of poor quality, the hours lost, the risk exposure.

Tone by context

The voice stays the same; the tone adjusts to the moment.

Context	Tone	Example
Website	Confident, calm, inviting	"See how your organisation really runs. Book a free audit and demo."
Proposals and reports	Formal, structured, evidence-led	"We recommend consolidating the three ledgers into one, which removes 11 days from the month-end close." (illustrative)
Client emails	Warm, brief, one clear action	"Your account is ready. Choose a password to sign in."
HQ and Client Portal	Efficient, neutral, specific	"Invoice INV-0042 sent to Acme Ltd."
Errors and warnings	Calm, never blaming, always a fix	"We couldn't save the invoice because the due date is missing. Add a due date and save again."
Internal alerts	Factual, urgent only when it is	"Acme Ltd uploaded proof of payment for INV-0042 (₦1.2m). Verify it in Payments."
AI assistant	A senior colleague who knows the numbers	"Receivables stand at ₦48.6m, up 6% on September. Two customers in Lagos account for most of the rise. Source: Invoices, updated today at 09:40."

The AI assistant

- Answer first, then the detail. Always name the data source and when it was last updated.
- Say plainly when it does not know: "I can't answer that from your data yet. Invoices before March 2026 aren't in HQ." / « Je ne peux pas encore répondre à partir de vos données : les factures antérieures à mars 2026 ne sont pas dans HQ. »
- Never invent a figure, a client or a person. Never name staff or leadership; refer to roles.
- Reply in the language of the question.

French (full parity)

French is a first language of the brand, not a translation afterthought. Every public page, email and client-facing screen ships in English and French.

- **Vouvoiement** always. **Register**: *courant soigné*, the French of a Big Four letter: complete sentences, no familiar turns of phrase, no administrative stiffness («veuillez agréer» only in formal letters).
- **Mood**: buttons, menu items and labels take the infinitive («Réserver un audit offert», «Envoyer l'invitation»). Sentences addressed to the reader take the *vous* imperative («Choisissez un mot de passe pour vous connecter. »).
- **Typography** uses Unicode characters, not the space bar. A narrow no-break space (U+202F) goes before the semicolon, question mark, exclamation mark and per cent sign, inside «», between a number and its unit, and as the thousands separator. A no-break space (U+00A0) goes before the colon. Decimals take a comma, and apostrophes are typographic (').
- **Sentence case**: «Audit de diagnostic», never «Audit de Diagnostic».
- **Allow for length**: French runs 20 to 30% longer. Buttons and labels are designed for the French length first, and layouts pass a pseudo-localisation test at +30% length.
- **Translate meaning, not words.** "Free audit" is «audit offert», never «audit libre» (libre means unrestricted).
- **Names**: JBS Praxis, JBS Praxis HQ and nfelia never change. Client Portal is translated as a name: «portail client JBS Praxis», then «votre portail client».
- **No anglicisms where French has the word**: workflow → circuit de validation or processus ; dashboard → tableau de bord ; task force → équipe projet ; lead → prospect.
- **Inclusive writing**: no point médian («collaborateur·rice»). In the interface use epicene nouns («la personne», «l'équipe»); in recruitment copy use doublets («collaborateurs et collaboratrices»).
- **Review**: a native francophone reviewer, ideally in Cameroon, signs off every French string before it ships (section 16).

Before and after

These are real strings from today's products, rewritten.

Today	English	Français
[ACTION REQUIRED] JBS Praxis Cryptographic Key Init	Set up your JBS Praxis account	Configurez votre compte JBS Praxis

"Within one working day" and "within the hour" are promises. They are used only once the owner confirms them as service levels (section 1, claims register).

5 Vocabulary

One word for one thing, everywhere: website, HQ, Client Portal, emails, documents. Where a term appears in database names or code identifiers, leave the code alone and change only what people read.

Canonical terms

Agents copy these exactly. Each concept has one English term and one French term.

Concept	English	Français
A JBS Praxis employee	staff member	collaborateur, collaboratrice
A person on a client's Client Portal account	team member	membre de l'équipe (n.m.)
The client's lead person	primary contact	interlocuteur principal, interlocutrice principale
The person running a client project	project lead	responsable de projet
The people delivering it	delivery team	équipe projet (n.f.)
Sign-in details and profile	account	compte (n.m.)
What a person may do	role	rôle (n.m.)
A paid piece of work	engagement (never a price on the site)	mission (n.f.), never « engagement »
The free first meeting	free audit and demo (in sentences); free operations audit (the offer's full name)	audit et démonstration offerts ; audit opérationnel offert
The primary button	Book a free audit and demo; "Book a free audit" where space is tight	Réserver un audit et une démonstration ; « Réserver un audit offert » où la place manque
A prospective client	lead (internal); organisation (external)	prospect (interne) ; organisation (externe)

Keep (do not over-correct)

These are correct professional terms and stay: general ledger, audit trail, audit log, OHADA, IFRS, ISO 27001, SHA-256, Lean Six Sigma, Kaizen (the method), executive summary, and «mission» in French.

Capitals

Capitalise product and platform names (JBS Praxis HQ, Client Portal, nfelia [always lowercase "n"]) and module names in navigation only. In running text, modules are common nouns: "Payments" in the menu, "your payments" in a sentence.

The glossary file

Sections 5 and 12 become `docs/glossary.csv` in PR2 (term, definition, part of speech, French gender, retired variants, context), with a copy check that searches `resources/views` and `app/Livewire` for retired terms before each release. The target is zero retired terms on screen, down from about 2,700 today.

6 Logo

The logo and its colours do not change. This section governs how it is used. The files are in the brand kit (`brand/kit/logo/`).

The mark

Ten horizontal bars form a diamond around the JBS letters and the PRAXIS wordmark. Each bar is split down the centre: dark on the left, teal on the right. The ends are cut on the diagonal. The split, dark into teal, is the brand's story in one shape: the institution as it runs today, and as it runs with the order made visible.

Stacked, colour
On Paper

Stacked, colour

Original artwork
Gradient; large brand moments only (owner to decide)

Versions

Version	Files	Use
Stacked, colour (two-tone)	`stacked-colour.svg`	Default on Paper, Mist and Teal Tint: website footer, documents, proposals, social
Stacked, reversed	`stacked-reversed.svg`	On Ink and Petrol: white and Bright Teal
Stacked, one colour	`stacked-ink.svg`, `stacked-white.svg`	One-colour print, stamps, embossing, watermarks
Horizontal lockup	`horizontal-colour.svg`, `-reversed`, `-ink`, `-white`	Every horizontal slot: website header, HQ and Client Portal rail, email header, slide footers
Monogram	`monogram-colour.svg`, `-reversed`, `-ink`, `-white`	Favicon, app icons, social avatars, very small spaces
Original artwork	`original-gradient.png`	The owner's original gradient artwork, kept unchanged for large brand moments (owner to decide, section 16)

The flat versions are built from the existing artwork: the same shapes, with the gradients replaced by the two flat colours they run between (Ink and Teal; white and Bright Teal on dark). The original gradients pass through the retired neon cyan, so the flat versions are the default everywhere. A clean vector redraw of the master (the current file is an automatic trace) is commissioned before print runs of more than 12mm height on paper.

Rules

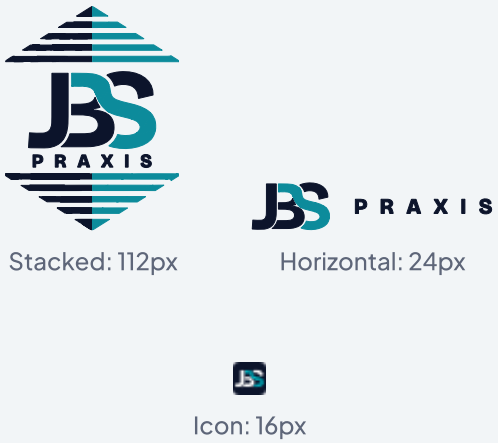

- **Clear space**: empty space on every side equal to the height of one bar plus one gap (about 5% of the stacked logo's height; 25% of the monogram's height).
- **Minimum size**: the stacked logo 112px tall on screen and 25mm in print. Below that, and in every horizontal slot, use the horizontal lockup: minimum 24px tall on screen, 8mm in print. The monogram alone: minimum 16px (favicon).
- **Backgrounds**: colour versions on Paper, Mist or Teal Tint. Reversed versions on Ink or Petrol. Never on Bright Teal, never on a busy photograph; on photography, place the logo on a solid Ink or Paper panel.

- **Never** recolour outside these versions, stretch, rotate, outline, add shadows or glows, animate, separate the bars from the letters in the stacked logo, or place inside a container shape (the app icon tile in section 14 is the one exception).
- **Endorsement**: when JBS Praxis endorses a product, the product logo leads and "a JBS Praxis product" sits beneath it in Plus Jakarta Sans at body-text size.

Clear space

One bar plus one gap on every side, about 5% of the logo's height.

Minimum sizes

On screen. In print: 25mm stacked, 8mm horizontal.

Don’t stretch or squash

Don’t recolour

Don’t rotate

Don’t add shadows or glows

Don’t place on busy images

7 Colour

The palette is the logo. Five colours from the mark, a family of cool neutrals derived from its navy, and four quiet functional colours. The neon cyan, neon green, hot pink and amber used in today's products are retired.

Ink
#0C142B

Paper #FFFFFF
Mist #F2F5F7
Teal Tint #E3F2F3
Line #D8DEE6
Line Strong #858C9D
Muted #5E6679
Slate #4A5468

Brand colours (from the logo)

Token	Hex	Role	Contrast
Ink	#0C142B	Primary text, dark surfaces, the deepest anchor	18.3:1 on white
Petrol	#044B6A	Hover and pressed state of primary actions; heading accent; data emphasis	9.5:1 on white
Deep Teal	#08707C	Links, primary actions, active states, focus rings	5.8:1 on white (AA text)
Teal	#0C8B9B	The logo's teal; large text, icons, chart series, the Praxis rule	4.1:1 on white (large text and graphics only)
Bright Teal	#0BB8C4	Accent on dark surfaces only: highlights, live data lines, focus on Ink	7.5:1 on Ink; 2.4:1 on white (never on light)

Neutrals

Token	Hex	Role
Paper	#FFFFFF	Cards, documents, email body

Token	Hex	Role
Mist	#F2F5F7	Page background, quiet sections
Teal Tint	#E3F2F3	Selected rows, highlights, callouts, information banners
Line	#D8DEE6	Dividers, card borders and decorative rules only (1.35:1); never the only edge of a control
Line Strong	#858C9D	Borders of inputs, selects, checkboxes, radios and toggles; the table header rule (3.4:1 on Paper, 3.1:1 on Mist)
Muted	#5E6679	Secondary text, captions, placeholders (5.7:1 on white, 5.3:1 on Mist)
Slate	#4A5468	Body text where Ink is too strong; table text (7.6:1 on white)

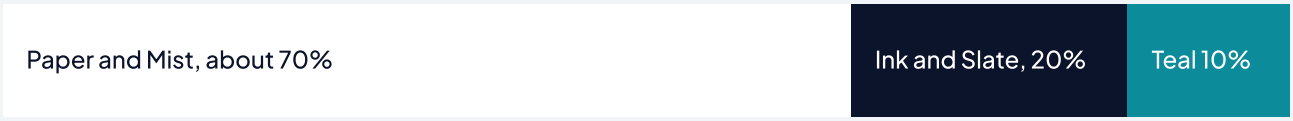

Functional colours

Used only to communicate state, always with a word or an icon, never colour alone.

Token	Hex	Tint (background)	Text on tint
Success	#1A6E47	#E7F4EC	5.5:1
Warning	#8A5700	#FBF1DF	5.4:1
Danger	#B3261E	#FBE9E7	5.6:1
Info	#044B6A (Petrol)	#E3F2F3 (Teal Tint)	8.2:1

• Paid • Awaiting signature • Overdue • Sent

Status always pairs the colour with a word. Text on its tint passes AA (5.4:1 to 8.2:1).

Proportions

On light pages: Paper and Mist about 70%, Ink and Slate (text) about 20%, the teal family about 10%. Teal is a signal, not a wash. One Bright Teal moment per dark section at most.

Dark surfaces

Ink is the brand's dark. Use it for the website footer, one chosen band per page, HQ's navigation rail and data-heavy panels. Never pure black.

On Ink	Hex	Contrast
Primary text	#FFFFFF	18.3:1

On Ink	Hex	Contrast
Secondary text (a solid colour, not opacity)	#BBBDC4	9.7:1
Rules and borders	#2E3549	1.5:1 (decorative only)
Accents, links, focus	Bright Teal #0BB8C4	7.5:1
Graphics and 24px+ text only	Teal #0C8B9B	4.5:1 (no margin)
Success / Warning / Danger	#4CC38A / #E0A33A / #F0857B	8.2:1 / 8.2:1 / 7.3:1
Never on Ink	Petrol, Deep Teal	1.9:1, 3.2:1

Primary text in white

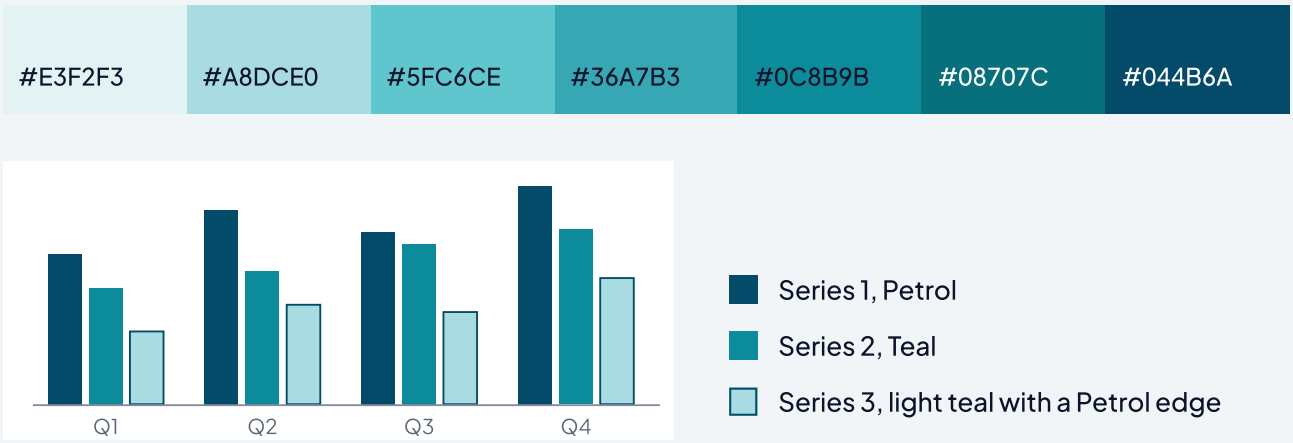

Secondary text in #BBBDC4, a solid colour rather than opacity.

Accents, links and focus in Bright Teal

Verified Awaiting verification Overdue

Data visualisation

- **Categorical**: at most three series, always labelled directly. On light: Petrol #044B6A, Teal #0C8B9B, and for a third series #A8DCE0 bars or areas with a 1px Petrol edge, or Petrol lines dashed 4–2. On Ink: Bright Teal, Paper, Teal. More than three series become small multiples.
- **Highlight one thing**: everything else in Line Strong #858C9D, the highlight in Deep Teal #08707C.
- **Sequential** (heatmaps, intensity): #E3F2F3, #A8DCE0, #5FC6CE, #36A7B3, #0C8B9B, #08707C, #044B6A. Cell labels in Ink on the first five steps (4.5:1 or more), in white on the last two (5.8:1 and 9.5:1).
- Status in charts uses the functional colours, with labels.

Accessibility

- Text meets WCAG AA (4.5:1) everywhere; large text (24px+, or 19px bold) at least 3:1.
- Non-text: control edges, focus rings, chart marks and meaningful icons reach 3:1 against their surface (WCAG 1.4.11).
- Selected rows add a 2px Deep Teal inset left edge to the Teal Tint fill (Teal Tint alone is 1.15:1 against Paper).
- Focus: a 2px Deep Teal ring with 2px offset on light backgrounds (5.3:1 on Mist), Bright Teal on Ink.
- Never use Teal or Bright Teal for body text on light backgrounds.

Print

CMYK and Pantone references are matched by the printer from a proof of the hex values before the first print run, then recorded here. Until then, print from the RGB files and approve a physical proof.

8 Typography

Two typefaces, clearly different jobs. **Newsreader speaks; Plus Jakarta Sans works.**

Aa

Newsreader

Speaks: headlines, the homepage line, headline numbers, email headlines, document titles.

Order, made visible.

₦4,200,000 « Réserver un audit offert » É À Ç

INV-0043	Atlantic Pharma (demo)	₦845,500	• Sent

Book a free audit and demo

Newsreader (serif, the voice)

A contemporary text serif designed for reading on screens, with optical sizes. It gives JBS Praxis the authority of a serious publication: the board paper, the annual report, the considered argument.

Use for: page headlines, section headlines, the homepage line, pull quotes, the large headline numbers on the website and in reports, email headlines, document titles.

- Weights: 400 for large display, 500 for headlines, 600 sparingly for small headlines. Italic for quotations only, not for emphasis inside a headline.
- Optical size: let the variable font's `opsz` follow the size (`font-optical-sizing: auto`).
- Letter-spacing: -0.01em at 40px and above; 0 below.
- Numbers: `font-variant-numeric: lining-nums proportional-nums` when static, `lining-nums tabular-nums` while animating.
- Never for buttons, form labels, table text or navigation.

Plus Jakarta Sans (sans, the work)

A warm, open geometric sans with excellent legibility at small sizes and tabular figures. It runs the product: everything a person reads to get something done.

Use for: body text, navigation, buttons, forms, tables, labels, HQ and Client Portal interfaces, captions, email body text.

- Weights: 400 body, 500 UI and emphasis, 600 labels and small headings inside the product, 700 rarely (a single key figure in a table).
- Numbers in tables, invoices and dashboards: tabular figures (`font-variant-numeric: tabular-nums`).
- Never set in all caps. Small labels stay in sentence case at 600 weight instead.

Type scale (web)

A perfect fourth (1.333) for display sizes; 2px steps for product sizes. Sizes in px; rem in code (16px = 1rem).

Role	Face	Size / line height	Weight
Display (homepage line, hero)	Newsreader	64 / 72 (mobile 40 / 48)	400
H1 (page title)	Newsreader	48 / 56 (mobile 34 / 42)	500
H2 (section)	Newsreader	36 / 44 (mobile 28 / 36)	500
H3	Newsreader	26 / 34 (mobile 22 / 30)	500
Headline number (site, reports)	Newsreader	56 / 60 (mobile 40 / 44)	400
Lead paragraph	Plus Jakarta Sans	20 / 32	400
Body	Plus Jakarta Sans	16 / 26	400
Small body, table text	Plus Jakarta Sans	14 / 22	400
UI label, button	Plus Jakarta Sans	14 / 20	500
Caption, helper text	Plus Jakarta Sans	13 / 18	400
Product page title (HQ, Client Portal)	Plus Jakarta Sans	24 / 32	600
Product section heading	Plus Jakarta Sans	18 / 26	600

Rules:

- Line length 60 to 75 characters for reading text; serif paragraphs (rare) may run to 80 with 1.6 line height.
- One H1 per page. Never skip a level for size; change the style, not the structure.
- Left-aligned text. Centre only short display lines in a hero or an email headline. Never justify.
- Display and H1 use `text-wrap: balance` . Test every heading with the French string first.
- Figures that are compared (tables, invoices, KPIs) are tabular and right-aligned.

Display 64 / 72	Ask your company anything.
H1 48 / 56	How we work
H2 36 / 44	Receivables fell 18% in Q3
H3 26 / 34	The Praxis Method
Headline number 56 / 60	₦48.6m
Lead 20 / 32	We design how your organisation runs, then build the system that answers for it.
Body 16 / 26	Most institutions run on effort: numbers rebuilt by hand every month.
UI label, button 14 / 20	Send invitation
Caption 13 / 18	Source: Invoices, updated today at 09:40.

Loading and fallbacks

- Self-host the latin and latin-ext subsets (the ₦ sign is in latin-ext). Newsreader with `opsz,wght` axes; Plus Jakarta Sans weights 400 to 700. Budget: no more than 150 KB of font files on a first visit, measured before PR2 ships.
- Before PR2, test ₦4,200,000, 2 500 000 FCFA, « Réserver » and 12,5 % in every weight.
- Fallback stacks, with metric-matched fallbacks generated by Capsize or fontaine (`size-adjust` , `ascent-override` , `descent-override`) so the page does not jump when fonts arrive:
  - `"Newsreader", "Newsreader Fallback", Georgia, serif`
  - `"Plus Jakarta Sans", "Plus Jakarta Sans Fallback", "Segoe UI", Arial, sans-serif`
- Email: most inboxes show the fallbacks (section 13). Design emails to look right in Georgia and Arial; numbers that matter are set in the sans.
- French is fully supported by both families; no substitute fonts.

Retired

Roboto Mono, Montserrat, Inter, Fira Code, Courier New, Trebuchet MS and IBM Plex Sans are removed from the brand. There is no brand monospace; reference codes (INV-0042) are set in Plus Jakarta Sans with tabular figures.

9 Layout and structure

The Praxis rule (signature device)

The signature comes from the logo, not from a layout grid: **horizontal rules only, never visible column lines.** It has three forms.

1. **Hairline**: 1px `#C5CCD6` on light, or 1px `#2E3549` on Ink, full content width. It separates sections in place of boxes.
2. **Bar stack**: for a section opener or a report cover. Three bars in the logo's proportions (on screen, 4px bars with 4px gaps; on covers, 12px bars with 13px gaps), ends cut on the diagonal like the logo's, dark (Ink or Petrol) left of the split and Teal right of it.
3. **The moment**: one 2px rule, Ink on the left and Teal on the right, with the split on the column where the answer starts. It draws left to right to join a question to its answer. Straight runs, at most one square turn, no dots, nodes or glows at the ends.

Use the rule as a device once or twice per page, never as a background pattern. In print: 0.25pt hairline, 1.2mm bars.

1. Hairline
Separates sections in place of boxes.

2. Bar stack
Section openers and report covers, cut like the logo's bars.

What are our receivables today? ₦48.6m

3. The moment
Joins a question to its answer, Ink then Teal across the split. Demo data.

Spacing

A 4px base with an 8–point rhythm. The allowed steps:

4, 8, 12, 16, 24, 32, 48, 64, 96 and 128px

- Within components: 4 to 16. Between related elements: 16 to 24. Between sections: 64 to 128 on the website, 32 to 48 in HQ and the Client Portal.
- HQ and the Client Portal: a 240px navigation rail (Ink) and a fluid workspace on Mist.

Responsive grid

Width	Columns	Gutter	Side margin
375 (phone)	4	16	16
768 (tablet)	8	24	32
1024 (laptop)	12	24	40
1280 and up	12	24	auto; content max 1200, reading text max 720

HQ tables on phones keep their first column fixed and scroll sideways inside the table, never the page.

Shape and elevation

- **Website: no cards.** Content sits directly on full-width Mist or Paper bands, separated by Praxis rules. On the website, radius is 0 except controls (4px) and framed product screens (8px).
- **HQ and the Client Portal**: cards with an 8px radius and a 1px Line border; 4px for inputs, chips and buttons; 12px for dialogs.
- Elevation through borders first. Shadows only for things that float above the page (menus, dialogs, toasts): `0 8px 24px rgba(12, 20, 43, 0.12)`.
- No gradients as decoration. A single gradient is allowed inside data (an area chart fill fading from Teal to transparent).

Iconography

- Lucide icon set, 1.5px stroke at every size (`absoluteStrokeWidth`), 20px default, 16px in dense tables, drawn in the text colour or Deep Teal for interactive icons.
- Icons accompany words; an icon alone needs a tooltip and an accessible name.
- Targets: at least 24px, and 44px on touch screens.

10 Imagery

A layered system: structure always, product as proof, place as context. Every image is chosen on purpose; if it would fit any company's website, it does not belong on ours.

The three layers

Layer	What it is	Role
Structure	The Praxis rule, flow diagrams, process maps, data drawn in the teal palette	Shows the method: order made visible
Product	Screens from HQ, the Client Portal and nfelia, captured from a demo tenant	Shows the proof
Place	Photography of the places African institutions operate: plants, ports, terminals, warehouses, offices, cities	Shows the context and the stakes

Where each layer appears

Page or surface	Structure	Product	Place
Homepage	Yes (hero)	Yes (proof sections)	At most one image, as a chapter opener
Industries (each sector page)	Yes	Yes	Yes: one deliberate image per sector
About	Yes	Minimal	Yes: the cities we work in (Lagos, Douala)
Careers	Light	No	Yes: places of work, no faces
Practice areas (Money, Human Capital and the rest)	Yes	Yes	No
Case studies	Yes	Yes	One image of the client's world, only where approved
JBS Praxis Insights articles	Diagrams only	Where relevant	No
HQ and Client Portal	Data only	—	No
Emails	No (logo and the Praxis rule only)	No	No

Sector images, one each, chosen with intent:

- Pharmaceuticals: a quality-control lab or cleanroom corridor, instruments not people, licensed from a facility that is not a client.
- Consumer goods: a distribution hub at dusk, pallets and trucks in order.
- Oil and gas: a terminal or rig at first light, scale and discipline.

- Public sector and cities: a city grid from above (Lagos, Douala), the shape of a system.
- Financial services and logistics: a port or depot, containers in rows.

Photography direction

- Real African places of operation, photographed or licensed specifically; no generic stock.
- Never shoot or license images of a client's site, signage, vehicles, uniforms, packaging or licence plates.
- No faces and no identifiable people. People, where present, are at a distance, in motion, or from behind.
- Natural light, early or late in the day. Composition favours order: lines, rows, symmetry.
- Grade: cool and slightly desaturated (saturation about –15%), shadows leaning towards Petrol, highlights clean, never tinted fully teal. A grading preset is made from the first approved set and kept with the brand kit.
- Never: handshakes, people pointing at screens, glowing brains, circuit boards, digital globes, padlocks, binary code, robots.

Product imagery

- Capture only from a demo tenant seeded with fictional organisations, people and amounts (for example "Atlantic Pharma (demo)"), never from production HQ or the Client Portal. Before use, check every capture for client names, staff names, initials and avatars.
- Frame screens simply: a Paper or Ink panel with an 8px radius, no device mock-ups with reflections.
- Crop to the detail that proves the point (one chart, one approval step) rather than whole screens.

Diagrams

1.5px strokes in Ink or Petrol, square line ends, small open arrowheads; boxes with a 4px radius and a 1px Line Strong border; labels in Plus Jakarta Sans 500 at 14px; one Teal path for the route that matters.

11 Motion

Composed and precise, with living data. The brand moves the way a well-run organisation does: things settle into place. Where data is involved, motion shows it arriving. Nothing bounces, spins or glows.

Principles

1. **Settle, don't perform.** Elements arrive and come to rest. No overshoot, no elastic easing.
2. **Motion explains data.** Lines draw as data arrives, values settle, charts grow from their baseline. Motion that does not explain something is cut.
3. **One orchestrated moment per page.** The website hero has one composed sequence. Sections below do not each animate in.
4. **Respond to people.** Opening, expanding, saving, confirming: motion that shows what changed is always welcome.
5. **Respect reduced motion.** With `prefers-reduced-motion`, ambient and data motion stop and scripts render the final state; only short opacity fades remain.

Living-data devices (the "Institutions in motion" layer)

Device	Where	Behaviour
Drawing line	Homepage hero, section openers, reports	The Praxis rule draws left to right to join a question to its answer; `--motion-story` (1200ms) with `--ease-settle`, once
Settling number	Headline numbers, KPI tiles	The final value is in the page from the start. A hidden visual layer rolls only the last two significant digits, from 97% of the value to the value, over `--motion-data` (600ms) with `--ease-settle`, once. Screen readers hear only the final value
Growing chart	Charts on first view	Bars and areas grow from the baseline over `--motion-data`; staggered 40ms per series at most
Quiet flow	One hero per site, optional	A very slow movement of fine horizontal lines (cycle 20s or longer, `--ease-linear`), marked `data-motion="ambient"`, paused when off-screen and stopped for reduced motion
Live tick	HQ dashboards with live data	A new value fades in over `--motion-quick`; a 1px Bright Teal marker pulses once on Ink

What are our receivables today?

₦48.6m

Source: Invoices, updated today at 09:40. Demo data.

The hero moment (storyboard)

Time	What happens
0ms	The page is complete: headline, support line, button and a framed HQ screen (demo data) showing a question and its answer.
0 to 150ms	The question's text fades up on the framed screen (`--motion-fade`).
150 to 1350ms	The Praxis rule draws from the question to the answer, Ink then Teal across the split (`--motion-story` , `--ease-settle`).
1350 to 1950ms	The answer's last two digits settle (`--motion-data`).
After	Stillness. Nothing loops.

With reduced motion, the final frame shows at once.

Tokens

Token	Duration	Use
`--motion-instant`	100ms	Hover, press, toggles
`--motion-fade`	150ms	Opacity-only fades (kept for reduced motion)
`--motion-quick`	200ms	Menus, tooltips, small reveals, every exit
`--motion-standard`	320ms	Panels, dialogs, page sections entering
`--motion-data`	600ms	Charts, value changes
`--motion-story`	1200ms	The one orchestrated moment

Easing token	Curve	Use
`--ease-settle`	`cubic-bezier(0.2, 0, 0, 1)`	Default for things arriving and moving, and the drawing line

Easing token	Curve	Use
`--ease-enter`	`cubic-bezier(0, 0, 0.2, 1)`	Entering the screen
`--ease-exit`	`cubic-bezier(0.4, 0, 1, 1)`	Leaving the screen (with `--motion-quick`)
`--ease-linear`	`linear`	Quiet flow only

Animate `opacity` and `transform` only (plus `stroke-dashoffset` for drawing lines). Never animate layout properties. Scripts check `matchMedia('(prefers-reduced-motion: reduce)')` and render the final state: lines drawn, numbers at their value, charts at full height.

Retired motion

Typewriter text effects, the animated logo GIF, the animated slogan GIF, neon glows and pulsing borders, "matrix" boot sequences, numbers counting up from zero, and fade-and-rise on every card are removed.

12 Interface writing patterns

These apply across the website, HQ and the Client Portal, in English and French.

Buttons and links

- Start with a verb and name the outcome: "Send invitation", "Verify payment", "Download report", «Envoyer l'invitation».
- Never "Submit", "OK", "Proceed", "Click here".
- The same action keeps the same word through the flow: a "Publish" button produces a "Published" confirmation.
- Link text names its destination ("Read the Money practice"), never "click here" or "learn more" alone.

Forms

- A visible label on every field; placeholders only for format hints ("e.g. +234 800 000 0000").
- Mark what is optional, not what is required.
- Validate when a person leaves a field; clear the error as soon as it is fixed.

Errors

Say what happened, why if it helps, and what to do next. Never blame, never apologise theatrically, never show codes or capitals.

> "We couldn't send the invitation because that email address already has an account. Ask the person to sign in, or use a different email address."
>
> «Nous n'avons pas pu envoyer l'invitation : cette adresse e-mail est déjà associée à un compte. Demandez à la personne de se connecter, ou utilisez une autre adresse.»

Empty states

What this is, why it is empty, how to start.

> "No invoices yet. An invoice is created here when a proposal is signed, or you can create one now." Button: "Create invoice".
>
> «Aucune facture pour l'instant. Une facture est créée ici dès qu'une proposition est signée ; vous pouvez aussi en créer une maintenant.» Bouton : «Créer une facture».

Confirmations

Name the action and the consequence, without assuming anyone's pronouns.

> "Suspend access for :name? They will be signed out and can't sign in until you restore access." Buttons: "Suspend access" / "Keep access".
>
> « Suspendre l'accès de :name ? Cette personne sera déconnectée et ne pourra plus se connecter tant que vous n'aurez pas rétabli son accès. » Boutons : « Suspendre l'accès » / « Conserver l'accès ».

Notifications (HQ)

The title says what happened; the body gives the detail and the place to act.

> "Proof of payment uploaded" / "Acme Ltd uploaded proof of a ₦1.2m payment for INV-0042. Verify it in Payments."
>
> « Justificatif de paiement déposé » / « Acme Ltd a déposé un justificatif de paiement de 1 200 000 ₦ pour la facture INV-0042. Vérifiez-le dans Paiements. »

Status labels

Short, plain and stored per object, because French past participles agree with their noun. Never reuse a feminine label for a masculine object. Always shown with the functional colour and its tint.

Object	Labels (English / Français)
Invoice / Facture (f.)	Draft / Brouillon; Sent / Envoyée; Paid / Payée; Overdue / En retard; On hold / En attente
Proposal / Proposition (f.)	Draft / Brouillon; Sent / Envoyée; Awaiting signature / En attente de signature; Signed / Signée; Declined / Refusée
Payment / Paiement (m.)	Awaiting verification / En attente de vérification; Verified / Vérifié; Not verified / Non vérifié
Account / Compte (m.)	Active / Actif; Suspended / Suspendu
Issue / Anomalie (f.)	Open / Ouverte; In progress / En cours; Resolved / Résolue

Alt text

Describe what the image shows and why it is there, in the page's language: "Containers in rows at a port at first light" / « Conteneurs alignés dans un port au lever du jour ». Decorative rules and patterns take an empty alt.

13 Email system

Email is often the first and most frequent contact a client has with JBS Praxis. Every message is designed, bilingual and on-brand, and still works in plain text.

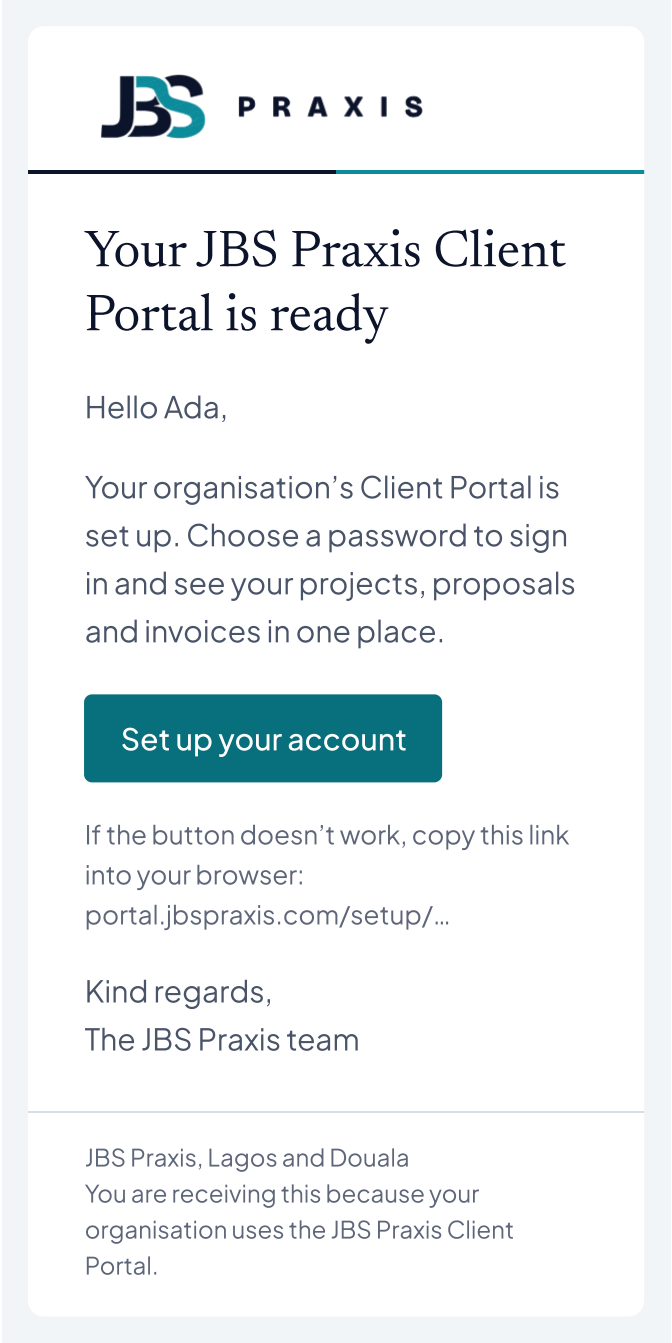

Sending

Setting	Value
From address	`system@jbspraxis.com` (all site email, including broadcasts)
From name	**JBS Praxis** (recommended change from "JBS Praxis Intelligence Desk"; owner to confirm)
Reply-To	`JBS Praxis <intelligence@jbspraxis.com>` on client-facing email; the visitor's address on internal enquiry alerts
Forwarding	`system@` forwards to `intelligence@` (in place since 29 Oct 2026)
Delivery	SMTP via mail.jbspraxis.com, relayed by SMTP2GO; SPF, DKIM and DMARC pass

The only email address that appears in any email is intelligence@jbspraxis.com. The contact line reads: "Reply to this email, or write to intelligence@jbspraxis.com." / «Répondez à cet e-mail ou écrivez-nous à intelligence@jbspraxis.com.»

Layout

Subject: Your JBS Praxis Client Portal is ready

Objet : Votre portail client JBS Praxis est prêt

Rules:

- **Header**: the horizontal lockup PNG (`brand/kit/email/`), exported on a solid white field that includes its clear space, so it stays visible when an inbox darkens the card. Under it, the 2px Praxis rule: Ink for the left half and Teal for the right half, built as two table cells with `bgcolor` .
- **Fonts**: `'Newsreader',Georgia,serif` and `'Plus Jakarta Sans',Arial,sans-serif` , plus an Outlook override, because Outlook for Windows otherwise falls back to Times New Roman:

`<!--[if mso]><style>h1,h2,.serif{font-family:Georgia,serif!important}td,p,a,li{font-family:Arial,sans-serif!important}</style><![endif]-->`

- **Container**: width 100%, max-width 600px; under 600px the card goes full width with 24px side padding.
- **Footer**: two lines, no separators: "JBS Praxis, Lagos and Douala" and why the person received the email.
- One primary action per email, as a "bulletproof" HTML button (works without images). The link is also written out below it.
- No images other than the logo. No photographs, no animated GIFs. Live text only; the email reads correctly with images off.
- Codes, amounts and dates are set in the sans at 600 with tabular figures.
- Every HTML email has a matching plain-text version. Inline CSS; tables for layout.
- Test matrix: Gmail (web, Android, iOS, light and dark), Outlook (Windows, web), Apple Mail (macOS, iOS, light and dark), Yahoo Mail.

Email colours are written as literal hex (CSS variables do not work in email): background `#F2F5F7`, card `#FFFFFF`, headline `#0C142B`, body `#4A5468`, secondary `#5E6679`, button `#08707C` with `#FFFFFF` text, links `#08707C`, rule `#0C142B` and `#0C8B9B`, footer dividers `#D8DEE6`.

Greeting and sign-off

- **English**: "Hello :first_name," in transactional email; "Dear :first_name," in proposals and formal letters. Close with "Kind regards," then "The JBS Praxis team".
- **French**: « Bonjour Madame :last_name, » or « Bonjour Monsieur :last_name, » when the title is known; otherwise « Bonjour, ». Never the first name alone. Close with « Bien cordialement, » then « L'équipe JBS Praxis ».

Language

English and French from launch. The email goes in the recipient's language: the language they used on the website, or their account's language preference once it exists. When unknown, English. All wording lives in translation files (`lang/en/emails.php`, `lang/fr/emails.php`); templates contain no hard-coded sentences.

Placeholders are code, not words. They are identical in both languages, in lower case and in English (`:name`, `:first_name`, `:last_name`, `:company`, `:project`, `:date`, `:time`, `:code`, `:amount`, `:invoice`).

Catalogue (subjects in EN / FR)

Email	To	Subject (EN)	Objet (FR)
Enquiry received	Visitor	We've received your message	Nous avons bien reçu votre message
Free audit requested	Visitor	We've received your request for a free audit	Nous avons bien reçu votre demande d'audit offert
Free audit confirmed	Visitor	Confirmed: your free audit on :date at :time WAT	Confirmé : votre audit offert le :date à :time (WAT)

Email	To	Subject (EN)	Objet (FR)
Cost of poor quality report	Visitor	Your report: the cost of poor quality at :company	Votre rapport : le coût de la non-qualité chez :company
Method download	Visitor	The JBS Praxis method you asked for	La méthode JBS Praxis que vous avez demandée
Staff invitation	Staff member	Set up your JBS Praxis HQ account	Configurez votre compte JBS Praxis HQ
Client invitation	Client	Your JBS Praxis Client Portal is ready	Votre portail client JBS Praxis est prêt
Team member invitation	Client team member	:name from :company has invited you to the JBS Praxis Client Portal	:name (:company) vous invite à rejoindre le portail client JBS Praxis
Proposal to sign	Client	Your proposal for :project is ready for signature	Votre proposition pour :project est prête pour signature
Signing code	Client	Your JBS Praxis signing code (valid for 10 minutes)	Votre code de signature JBS Praxis (valable 10 minutes)
Sign-off request	Client	:project: the handover is ready for your sign-off	:project : la livraison est prête pour votre validation
Password help	Client or staff	Reset your JBS Praxis password	Réinitialisez votre mot de passe JBS Praxis
Invoice issued	Client	Invoice :invoice from JBS Praxis	Facture :invoice de JBS Praxis
Payment verified	Client	Payment received for invoice :invoice	Paiement reçu pour la facture :invoice
Payment reminder	Client	Reminder: invoice :invoice is due on :date	Rappel : la facture :invoice arrive à échéance le :date
Overdue notice	Client	Invoice :invoice is now overdue	La facture :invoice est en retard de paiement
Access on hold	Client	Your Client Portal access is on hold: unpaid invoice :invoice	Votre accès au portail client est suspendu : facture :invoice impayée
Broadcast	Subscribed contacts	Editorial subject, sentence case	Objet éditorial
New enquiry (internal)	intelligence@	New enquiry: :company	—
New free audit request (internal)	intelligence@	New free audit request: :company, :date	—
System Health alert (internal)	intelligence@	System Health: :what_failed	—

The signing code appears in the body only, never in the subject. Internal emails use the same layout in English only, with the facts in a simple two-column table and the action link to HQ.

Legal lines

- Why you received this: "You are receiving this because you contacted JBS Praxis through jbspraxis.com." / « Vous recevez ce message parce que vous avez contacté JBS Praxis via jbspraxis.com. »

- Broadcasts only: "Unsubscribe from JBS Praxis Insights" / «Se désabonner de JBS Praxis Insights».
- Proposals and reports: "Confidential: prepared for :company." / «Confidentiel : préparé pour :company.»
- Data protection wording (Nigeria's Data Protection Act and Cameroon's personal data law) is confirmed by counsel before launch.

14 Applications

Website (PR2 to PR4)

- Light by default: alternating Mist and Paper full-width bands, Ink text, Praxis rules between sections. Ink for the footer and one chosen band per page.
- Hero: the Newsreader display line "Ask your company anything.", the support line "We design how your organisation runs, then build the system that answers for it.", one primary action ("Book a free audit and demo"), and the hero moment (section 11) on a framed HQ screen with demo data.
- Header: the horizontal lockup, navigation in Plus Jakarta Sans 500, sentence case. Language switch EN / FR always visible.
- No prices anywhere; the free audit and demo is the single call to action.

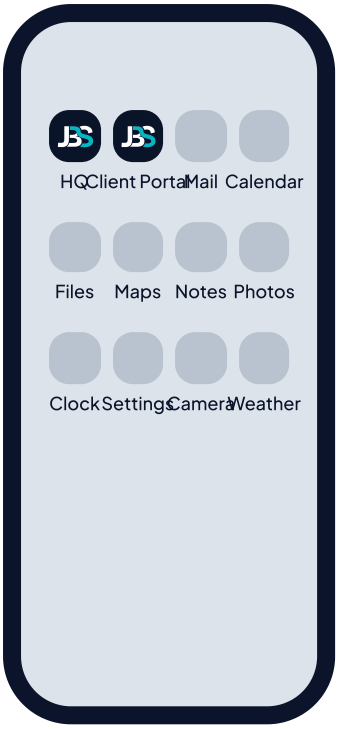

JBS Praxis HQ and the Client Portal

- Light workspace on Mist with Paper cards; a 240px Ink navigation rail with the reversed horizontal lockup at the top, white text and a Bright Teal indicator for the current page.
- Plus Jakarta Sans throughout, Newsreader only for the page's main headline number where a page has one (for example, cash position on the finance overview).
- Data first: tables with tabular figures, Line Strong control borders, functional colours for status.
- The vocabulary in section 5 replaces every on-screen term; route names and database columns stay as they are.

App icons, favicons and splash screens

HQ and the Client Portal install as progressive web apps. The files are in `brand/kit/icons/` and `brand/kit/splash/`.

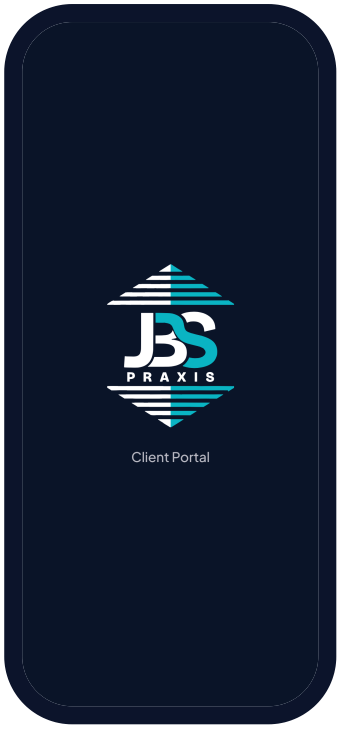

- **App icon**: the reversed monogram (white with Bright Teal) centred on an Ink tile, the one place the logo sits inside a shape. The maskable version keeps the monogram inside the central 80% safe zone so Android can crop it to any shape.
- **Favicon**: the same Ink tile at 16, 32 and 48px (`favicon.ico`), plus `favicon.svg` for modern browsers and `apple-touch-icon.png` (180px) for iPhone and iPad.
- **Splash screen**: Ink background, the reversed stacked logo centred, the app name beneath it in Plus Jakarta Sans 500 ("HQ" or "Client Portal"). Android builds it from the manifest (`background_color` Ink, the 512px icon, the app name); iPhone and iPad use the startup images in the kit.
- **Manifest values**: name "JBS Praxis HQ" / "JBS Praxis Client Portal"; short name "HQ" / "Client Portal"; `theme_color` and `background_color` `#0C142B` ; `display` standalone.

LinkedIn avatar

Link preview, English (1200 × 630)

Link preview, French

Documents (proposals, reports, invoices)

- A4, generous margins (25mm), Newsreader titles and headline numbers, Plus Jakarta Sans text at 10.5/16.
- Cover: the stacked logo, title, client (or "a leading pharmaceutical manufacturer" where the client is not named), date, and the bar stack (section 9).
- Headings are action titles (section 4). Every proposal opens with a one-page executive summary.
- Invoices: plain and exact. Legal entity name, tax IDs, bank details from master data, tabular figures, totals in Plus Jakarta Sans 600.

Social and presentations

- LinkedIn first. Square and 4:5 formats: a Newsreader headline on Mist or Ink, one Praxis rule, the horizontal lockup small in a corner. The profile avatar is the app icon tile.
- Slides: 16:9, one idea per slide, action titles in Newsreader, data drawn in the teal palette, no stock imagery.

Careers (employer brand)

- The promise to recruits: serious work, done well, that builds a career.
- Describe the work and how people grow, not perks. No "rockstars", "ninjas" or "warriors".
- Roles named plainly, with the sector backgrounds they draw on. Recruitment copy in French uses doublets (« collaborateurs et collaboratrices »).
- Imagery follows section 10: places of work, no faces.

15 Design tokens

For the website rebuild (PR2), HQ and the Client Portal. The project uses Tailwind v4, so colours, fonts, type sizes, radii, shadows and easings go in `@theme` in `resources/css/app.css`. Motion durations and focus values are plain CSS variables in `:root`, because they are not Tailwind namespaces. Remove the Tailwind Play CDN script from `layouts/app.blade.php`, `portal/proposal-gateway.blade.php` and `copq-report.blade.php`, so every page compiles against this one theme.

Spacing uses Tailwind's 4px `--spacing` base; the allowed steps are 1, 2, 3, 4, 6, 8, 12, 16, 24 and 32 (4px to 128px). Breakpoints stay at Tailwind's defaults (md 768, lg 1024, xl 1280).

```
@import 'tailwindcss';

@theme {
  /* Brand (from the logo) */
  --color-ink: #0C142B;
  --color-petrol: #044B6A;
  --color-deep-teal: #08707C;

  html { scroll-behavior: auto; }
}
```

The metric-matched `@font-face` fallbacks ("Newsreader Fallback" from local Georgia, "Plus Jakarta Sans Fallback" from local Arial) are generated at build time in PR2.

16 Governance, rollout and open decisions

Before anything ships

- [ ] Every word follows section 4 and the vocabulary in section 5, in English and French; the copy check finds no retired terms.
- [ ] A native francophone reviewer has signed off the French; layouts pass the +30% length test.
- [ ] Only the colours in section 7; text contrast at AA or better; control edges, focus rings and chart marks at 3:1.
- [ ] Only Newsreader and Plus Jakarta Sans, in the roles in section 8; no all caps.
- [ ] The right logo version for the space and background (section 6).
- [ ] Images follow section 10: right layer, right page, chosen on purpose, no faces, demo data only.
- [ ] Motion follows section 11 and stops for reduced motion.
- [ ] Every claim is in the claims register; no client named without approval; no person named; no certificate claimed that is not held.

Rollout

1. **Emails** (next): the bilingual templates in section 13. The first thing clients will see.
2. **PR2, foundation**: tokens, self-hosted fonts, logo versions and icons in the products, the copy check, the HQ and Client Portal vocabulary pass, the From name.
3. **PR3**: the homepage, the hero moment and the demo.
4. **PR4**: proof pages, Industries, JBS Praxis Insights and the French site.
5. **Then**: proposal, report and invoice templates; LinkedIn templates; the slide master.

Brand health (reviewed every quarter)

- Free audits booked per month, and the share that come from the website.
- The share of enquiries and audits in French.
- Retired terms on screen (target zero, from about 2,700).
- Accessibility checks passed on new pages (target 100%).
- Proposal win rate, and the time from first enquiry to signed engagement.

Open decisions (owner)

1. **From name**: "JBS Praxis" (recommended) or keep "JBS Praxis Intelligence Desk".
2. **Logo versions**: approve the flat two-tone versions as the default and the horizontal lockup arrangement; decide where, if anywhere, the original gradient artwork is still used.
3. **Signature device**: approve the Praxis rule, taken from the logo's bars, in place of visible grid lines.
4. **The method**: the name "the Praxis Method" and its four stages (See, Design, Build, Hold).

5. **Name story**: whether "JBS" is ever expanded in public (recommended: no).
6. **HQ**: whether JBS Praxis HQ will ever be sold, or is shown only as proof.
7. **Service levels**: whether "within one working day" and "within the hour" can be promised.
8. **Credentials**: confirm the list of sector backgrounds in section 1.
9. **Horizon Segment**: whether the client can be named.
10. **Primary button**: "Book a free audit and demo" (the earlier decision, with "and" in place of "&") or the shorter "Book a free audit".

Work to commission

- A clean vector redraw of the logo master, with no change to the design.
- Printer-matched CMYK and Pantone values.
- The grading preset for photography, from the first approved set.
- Component specifications with every state (default, hover, focus, pressed, disabled, error, loading) for buttons, inputs, selects, tables, status pills, tabs, dialogs, toasts and the HQ rail, in PR2.
- `docs/glossary.csv` and the copy check, in PR2.

Changing this document

The owner approves changes. Each change is a new version with a line in the log below and, where a decision changes, an entry in Appendix A.

Version	Date	Change
1.0	29 Oct 2026	First version from the eight brand decisions
1.1	29 Oct 2026	Revised after independent strategy, visual and language reviews: platform rebuilt around the name, method and descriptor added, claims register, canonical bilingual vocabulary, French typography, logo versions and icons, Praxis rule, accessible colour fixes, Tailwind v4 tokens, email catalogue and greetings

A Decisions log

#	Question	Decision (29 Oct 2026)
1	Essence	Order, made visible, with a touch of "Institutions in motion" and "Ask your company anything"
2	Personality	The quiet expert, with a subtle touch of the rigorous engineer
3	Voice	Plain, precise and warm, with a measured Big Four / McKinsey formality
4	Colours	Logo teals and navy only; neon reduced to nothing
5	Typography	Newsreader (primary, speaks) and Plus Jakarta Sans (secondary, works)
6	Motion	A hybrid of composed precision and living data
7	Imagery	Layered system (structure, product, place); place photography on Industries, About and Careers, chosen with intent
8	Naming	Plain names: JBS Praxis HQ, Client Portal, everyday words inside
—	Languages	English and French from launch, including email
—	Email routing	Replies and all site alerts go to intelligence@; everything is sent from system@

Earlier decisions that stand: the homepage line "Ask your company anything"; proof organised by business domain; no prices, a free audit and demo instead; no certificates claimed ("aligned with ISO 27001"); light design led by the logo's teal; no named leadership; the pharmaceutical engagement described, not named; never "predictive" until forecasting ships.

Earlier decisions replaced: the signature "Complexity, composed." gives way to "Order, made visible." (decision 1); IBM Plex Sans gives way to Newsreader and Plus Jakarta Sans (decision 5).

B Retired elements

Element	Replaced by
Neon cyan `#00E5FF` and `#00DDED`, neon green `#00FF66`, amber `#FFBD2E`, hot pink `#FF3366`, orange `#FF750F`	The logo palette and functional colours (section 7)
Navy UI background `#0A1128`, near-black `#03050A`, slate `#8A9BB2`	Ink `#0C142B`, Mist, Muted
Roboto Mono, Montserrat, Inter, Fira Code, Courier New, Trebuchet MS, IBM Plex Sans	Newsreader and Plus Jakarta Sans
`logo_light.png`, `logo_dark.png`, `logo_monochrome.svg`, `animated_logo.gif`	The logo versions in `brand/kit/logo/` (section 6)
Visible column grid lines as a device	The Praxis rule (section 9)
Command-centre and military vocabulary (about 2,700 uses)	Section 5
All-caps labels, `>` prompt prefixes, "ERR:" messages	Sentence case, plain errors (section 12)
Typewriter effects, animated logo and slogan GIFs, glows, count-up numbers	Section 11
`[ACTION REQUIRED]` subject lines, the "Intelligence & Architecture Desk" signature, info@ in emails	Plain subjects, "The JBS Praxis team", intelligence@ (section 13)

C Brand equity (what we keep from the old site)

Element	Decision	New form
"Organisations do not fail for lack of ideas…"	Keep, rewritten	"Organisations do not fail for lack of ideas. They fail in the gap between the plan and the daily work." / «Les organisations n'échouent pas faute d'idées. Elles échouent dans l'écart entre le plan et le travail de tous les jours.»
"We do not digitise confusion; we remove it."	Keep	FR : «Nous ne numérisons pas la confusion : nous la supprimons.»
The "autopsy, not a strategy" line	Keep, rewritten, About page only	"A report that only explains what went wrong is an autopsy, not a strategy." / «Un rapport qui se contente d'expliquer ce qui n'a pas fonctionné est une autopsie, pas une stratégie.»
"We build fortresses, but we hand over the keys"	Keep the second half	The value "Make it hold, then hand over the keys" (section 1)
"Beyond Strategy", "Strategy Graveyard" / «Le cimetière des stratégies», "Forged in Pressure"	Retire	—
"The Operational Chaos Tax"	Retire	The cost of poor quality calculator
™ marks (Predictive Praxis Framework™ and others)	Retire	No trademark marks unless a registration is held
"Complexity, composed."	Retired by decision 1	"Order, made visible."
The meaning of "JBS"	Not expanded in public (owner to confirm)	JBS Praxis is the name
